17. Impact of Covid-19

The continues spread of the coronavirus ("COVID-19") across various geographies globally, which was declared a pandemic by the World Health Organization, has caused disruption to business and economic activities. The fiscal and monetary authorities around the world, including Kuwait, have announced various support measures across the globe to counter the possible adverse implications of COVID-19. This note describes the impact of the outbreak on the Company's operations and the significant estimates and judgements applied by management in assessing the values of assets and liabilities as at June 30, 2021.

(a) Credit risk management

The management of the Group has taken several measures to manage its risk associated with the pandemic, including identification of the most vulnerable sectors primarily affected and placing added measures to ensure a high level of scrutiny. The uncertainties caused by COVID-19 required the Group to consider the impact of higher volatility considered for the determination of expected credit losses ("ECLs") as at June 30, 2021.

(b) Liquidity risk management

In response to the COVID-19 outbreak, the Group is closely evaluating its liquidity and funding position and taking appropriate actions. The Company will continue to assess its liquidity position by closely monitoring its cash flows and forecasts.

(c) Fair value measurement of financial instruments

The Group has considered potential impacts of the current market volatility in determination of the reported amounts of the Group's financial assets, and this represents management's best assessment based on observable available information as at the reporting date. Given the impact of COVID-19, the Group has assessed whether the fair values of the financial assets and liabilities represents the price that would be achieved for transactions between market participants in the current scenario.

Further information on the Group's policy in relation to fair value measurements is disclosed in (Note 15).

(d) Going concern

The Group has performed an assessment of whether it is a going concern in light of current economic conditions and all available information about future risks and uncertainties. The projections have been prepared covering the Company's future performance, capital and liquidity. The impact of COVID-19 may continue to evolve, but the present time the projections show that the Company has ample resources to continue in operational existence and its going concern position remains largely unaffected and unchanged from March 31, 2021. As a result, this interim condensed consolidated financial information has been prepared on a going concern basis.

The existing and anticipated effects of the outbreak of COVID-19 on the global economy and financial markets is expected to continue to evolve. The scale and duration of these developments remain uncertain at this stage but could negatively impact the Group's financial performance, cash flows and financial position in the future. The Group will continue to monitor the market outlook and update its assumptions, and forecasts as that may have a substantial impact on the interim condensed consolidated financial information in the future.
